Professional Summary

Software Engineer building scalable, cloud-native full-stack systems with React, Node.js, Java/Spring Boot, and REST APIs using microservices and API-first design. Delivered a 5-service job portal, a multi-tenant AI platform on AWS (ECS Fargate, RDS, ElastiCache, Elasticsearch/OpenSearch, MSK) via Terraform + GitHub Actions CI/CD, and an on-device AI code reviewer running entirely on a Snapdragon NPU. Strong grounding in DSA and design patterns (**2,000+ problems solved**); Agile sprint-based delivery. ICPC 2026 Global Rank **1025**; Naukri Young Turks 2025 **96.83 percentile**. Seeking Software Engineering / Full-Stack / Backend internships.

Technical Skills

Languages:	Java, JavaScript, TypeScript, Python, C#, SQL
CS Fundamentals:	Data Structures, Algorithms, Design Patterns, OOP, Arrays, Trees, Graphs, Dynamic Programming, Heaps, Hashing
Frontend:	React.js, Next.js, React Native, Tailwind CSS, HTML, CSS, Responsive & Accessible UI
Backend:	Spring Boot, J2EE / Java EE, .NET, Node.js, Express.js, FastAPI, REST APIs, Microservices, API-First Design, JWT, Prisma
Databases & Search:	PostgreSQL, MongoDB, Redis, SQLite, Qdrant, Elasticsearch / OpenSearch
AI / GenAI:	LangChain, LlamaIndex, RAG, Embeddings, Gemini API, Qwen, On-Device / Edge AI Inference, Vector Search, AI Agents
Cloud & DevOps:	AWS (ECS Fargate, RDS, ElastiCache, MSK), Terraform, Docker, Kubernetes, Git, GitHub Actions, CI/CD, IaC, Agile/Scrum, System Design

Education

Ambalika Institute of Management and Technology, Lucknow — Jul 2023 – Jul 2027 (Expected)
Bachelor of Technology in Computer Science and Engineering — *CGPA: 7.2*

Experience

Labmentix — Web Development Intern — Aug 2025 – Nov 2025 | Remote
Next.js, React, Tailwind CSS | grinning.vercel.app

- Developed and deployed a responsive, mobile-first landing page using reusable Next.js/React components and Tailwind CSS, participating in Agile sprint ceremonies and peer code reviews.
- Implemented responsive layouts, navigation, product sections, and CTA flows while independently handling component development and cross-device testing.

Projects

Support SaaS — AI Support Platform | *Next.js, Express, FastAPI, Java 21, Spring Boot, AWS, Terraform, Redis, Qdrant, Kafka*
Mar 2026 – Jul 2026

- Architected a **multi-tenant, cloud-native AI support platform** using Next.js, Express/TypeScript, FastAPI, JWT/RBAC, and organization-isolated knowledge bases, following an API-first, domain-driven microservices approach.
- Provisioned production AWS infrastructure (**ECS Fargate, RDS, ElastiCache, Elasticsearch/OpenSearch, MSK**) via **Terraform** with GitHub Actions OIDC deploys for IaC and CI/CD; automated API and AI-service test suite gated every PR.
- Engineered a **RAG pipeline** (LangChain, LlamaIndex, Qdrant, embeddings, Gemini) for org-scoped knowledge retrieval, backed by a **Java 21/Spring Boot semantic cache** (**O(1) LRU**, Bloom Filter, random-hyperplane LSH, cosine similarity, Redis, TTL eviction) for scalability and low latency.
- Implemented **cache-aside graceful fallback**, tenant-aware validation, and observability metrics (hits, misses, latency, evictions, LLM requests avoided).

NextHire — AI-Powered Job Portal | *Next.js, Node.js, PostgreSQL, Redis, Kafka, Gemini* — Aug 2025 – Nov 2025

- Architected a **5-service microservices platform** (Auth, User, Job, Payment, Utils) with JWT authentication, Redis-backed token revocation, and Kafka-based asynchronous processing for scalability and maintainability.
- Built 4 AI career tools—Resume Builder, Resume Analyzer, ATS Score Checker, Career Guidance—using Gemini API; implemented PostgreSQL (NeonDB), Redis caching, recruiter subscriptions, payments, and RBAC via REST APIs.

CoderX — Private On-Device AI Code Review Platform | *Python, FastAPI, React Native, Qwen3-4B, Snapdragon NPU, GenieX, SQLite, WebSockets* — 2026

- Built an **on-device AI code reviewer** for the Snapdragon® Multiverse Hackathon running a Qwen3-4B model entirely on a **Snapdragon NPU** via GenieX, with zero source code ever leaving the machine.
- Designed a **risk-aware routing engine** classifying each Git diff hunk (critical/standard/trivial) before it reaches the NPU, plus an **incremental SQLite review cache** keyed on normalized diff hashes to skip redundant re-reviews.
- Implemented **Git post-commit hooks and HMAC-verified GitHub PR webhooks** triggering a FastAPI backend, streaming live findings over WebSockets to a React Native (Expo) mobile triage app with a human-in-the-loop reiteration flow and offline **PDF/JSON audit reports**.

Achievements & Leadership

- **Competitive Programming:** ICPC 2026 Online Challenge 1 powered by Huawei (Codeforces #2251) — Global Rank **1025**; Codeforces Rating 1200; CodeChef DSA Rating 1640; LeetCode Contest Global Rank **874** among 27,000+ participants; **2,000+ DSA problems** solved across LeetCode, Codeforces, CodeChef, and GeeksforGeeks.
- **Naukri Campus Codequezt #31:** Ranked **#441** among **14,000+ participants** nationwide in the Codequezt #31 Coding Challenge hosted by Naukri Campus.
- **Pardis Technology Olympics 2026:** Ranked **#45** among **1,065 competitors** in the Algorithm Track Online Qualifier (Codern Online Judge), Pardis Technology Park, Tehran.
- **Academic Recognition: 96.83 percentile** in Naukri Campus Young Turks 2025 (national technical assessment); ranked top 10% of institute for coding and leadership.
- **Leadership & Hackathons: 3rd place** in college hackathon for an Image-Provenance Utility (cryptographic signatures); organized coding/technical events with 100+–200+ participants as Unstop Campus Ambassador and event lead.
